

Pathways to Partnership

Connect • Collaborate • Support

Resolving conflict. Preserving relationships.

Shaping dispute prevention and resolution across California.

Together, we are creating a unified educational community that equips families and educators with the skills to prevent and resolve conflicts, and to foster trust and collaboration with students at the center. We are focused on addressing issues at the earliest sign of dispute to maintain strong relationships within IEP teams, ensuring that the IEP process leads to positive and equitable outcomes for all students with disabilities. By utilizing our resources, we will transform how special education conflicts are handled in California and create a statewide system of support for dispute prevention and resolution that serves our students.

Build Collective Capacity

We bring families and educators together to establish a collaborative culture to prevent and resolve conflicts through projects like our Community of Practice.

Promote Shared Expertise

We provide trainings and coaching and share knowledge with families and local dispute resolution professionals to increase common understanding.

Provide Targeted Resources

We work directly with families and educators to problem solve and provide the materials and technical assistance needed to prevent and resolve conflict.
